The Doosan model BWS17S-7 Electric Walkie Stacker Truck can move loads up to 3,300lbs. Three optional mast lift heights up to 145" allows you to tailor your stacker to meet your warehouse requirements. A standard 200 amp hour, 24 volt battery/charger pack can be charged with any 110 volt power outlet.

Doosan's BW23S-7 Electric Walkie Pallet Truck has dual lift cylinders to evenly lift loads of up to 4,500lbs and is available in various fork lengths. The standard 24 volt battery/charger pack provides 185 amp hours of power for extended run times and the built-in charge allows recharging from any 110 volt power outlet.

The Doosan HPT manual Hand Pallet Truck is the absolute low cost solution for your material handling requirements. A reinforced high strength steel frame along with superior hydraulics make easy work of 5,500lb loads. The HPT's standard poly load wheels are combined with entry and exit rollers to smooth the transition in and out of pallets.

You can count on Doosan...

Doosan's Walkie Warehouse trucks are cost effective solutions for moving products economically and safely. Doosan's BWS17S-7 Electric Walkie Stacker, BW23S-7 Electric Walkie Pallet, and HPT28 manual Hand Pallet Trucks ensure dependable service and long life.

The Doosan Electric Walkie Warehouse Series has AC drive for higher efficiency and lower maintenance costs. Curtis controllers provide reliable performance, smooth acceleration, and seamless directional changes for safer operation. A combo hour meter/battery discharge indicator is standard to track operating hours and reserve power.

Standard on Doosan Electric Walkie Trucks, AC motors help to increase overall unit acceleration, adds needed torque, improves efficiency, boosts run times, all while lowering maintenance costs.

Doosan's BWS17S-7 Walkie Stacker has a convenient top storage tray for operator essentials. The storage tray flips up to allow quick access to the battery compartment and the coiled cord charging cable.

Doosan's control handles on the Walkie Warehouse Series are designed to be both ergonomic and durable. All functions are easy to operate, reducing operator fatigue and increasing productivity.

The HPT Hand Pallet Truck has steel reinforcements in key areas of the frame for increased strength and service life.

A three-position lever on HPT Hand Pallet Trucks provide the operator with precise control when maneuvering loads.
